1. Introduction

The Stock Monitoring System is designed to manage and monitor wire and cable inventory operations efficiently. The system helps users track materials, manufacturing, stock availability, customer orders, allocation, dispatch activities, and inventory movement through a centralized dashboard.

The application provides:

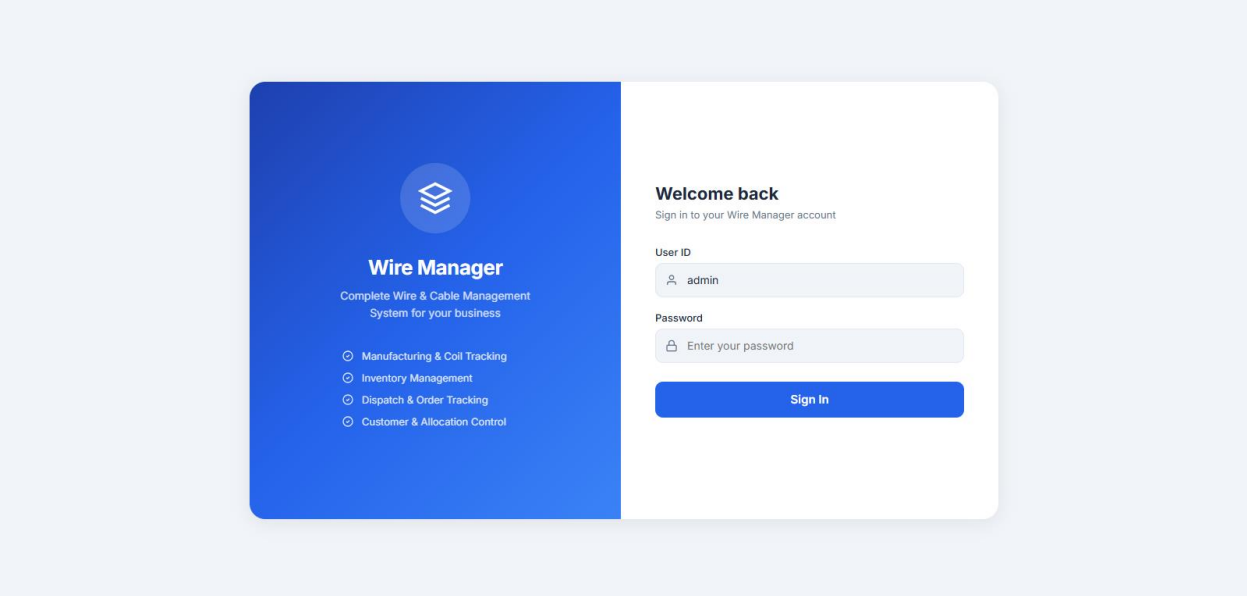

- Real-time stock visibility
- Coil and inventory tracking
- Order management
- Dispatch monitoring
- Manufacturing tracking
- Reporting and analytics

2. Login to the System

Step 1:

Open the application URL in your web browser.

URL: https://wiremanager.aonesalasar.com/dev/

Step 2:

Enter your:

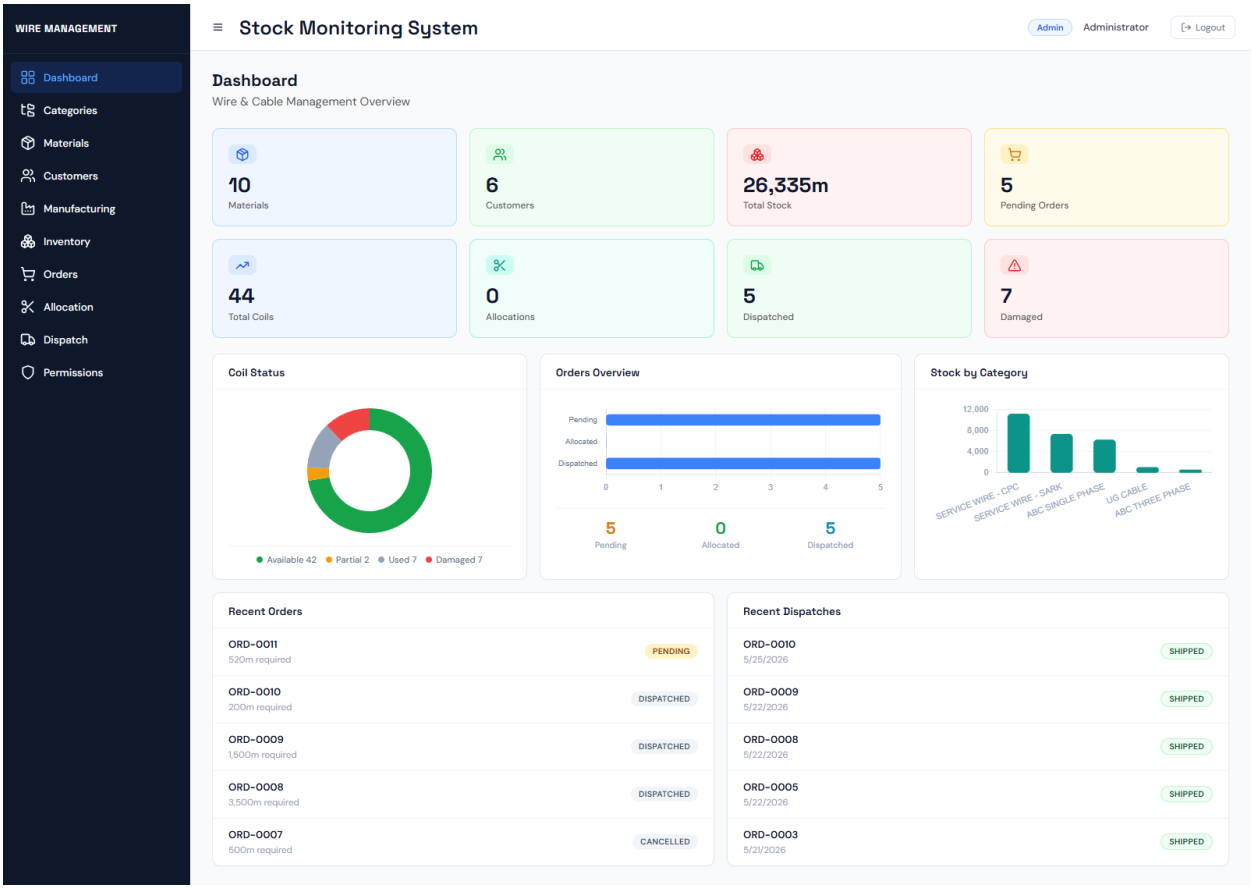

- Username
- Password

Step 3:
Click on the **Login** button.

Note:
Please contact the administrator if you forget your login credentials.

3. Dashboard Overview

The Dashboard provides a quick summary of the complete wire and cable inventory operations.

Dashboard Sections

KPIs

Sr no.	Section	Description
1	Materials	Displays total available material categories
2	Customers	Shows total registered customers
3	Total Stock	Displays total stock quantity available
4	Pending Orders	Shows orders awaiting processing
5	Total Coils	Displays total coils in inventory
6	Allocations	Shows allocated stock count
7	Dispatched	Displays completed dispatch count
8	Damaged	Shows damaged inventory count

Charts & Analytics

1. Coil Status

Displays the current status of coils:

- Available
- Partial
- Used
- Damaged

Purpose:
Helps users monitor inventory condition and stock utilization.

2. Orders Overview

Displays:

- Pending Orders
- Allocated Orders
- Dispatched Orders

Purpose:
Provides quick visibility of order processing status.

3. Stock by Category

Displays stock quantity based on material categories.

Purpose:
Helps users analyze stock distribution across different cable categories.

4. Recent Orders

Display recent orders

Purpose: Helps to know the recent orders which are created

5. Recent Dispatches

Display recent dispatches

Purpose: Helps to know the recent dispatches which are completed.

4. Navigation Menu

The left-side menu provides access to all modules.

Modules	Purpose
Dashboard	View system overview
Categories	Manage Materials categories
Materials	Manage materials items
Customers	Manage customer information
Manufacturing	Track production activities
Inventory	Monitor stock inventory
Orders	Manage customer orders
Allocation	Allocate stock against orders
Dispatch	Manage dispatch operations
Permissions	Manage user access rights

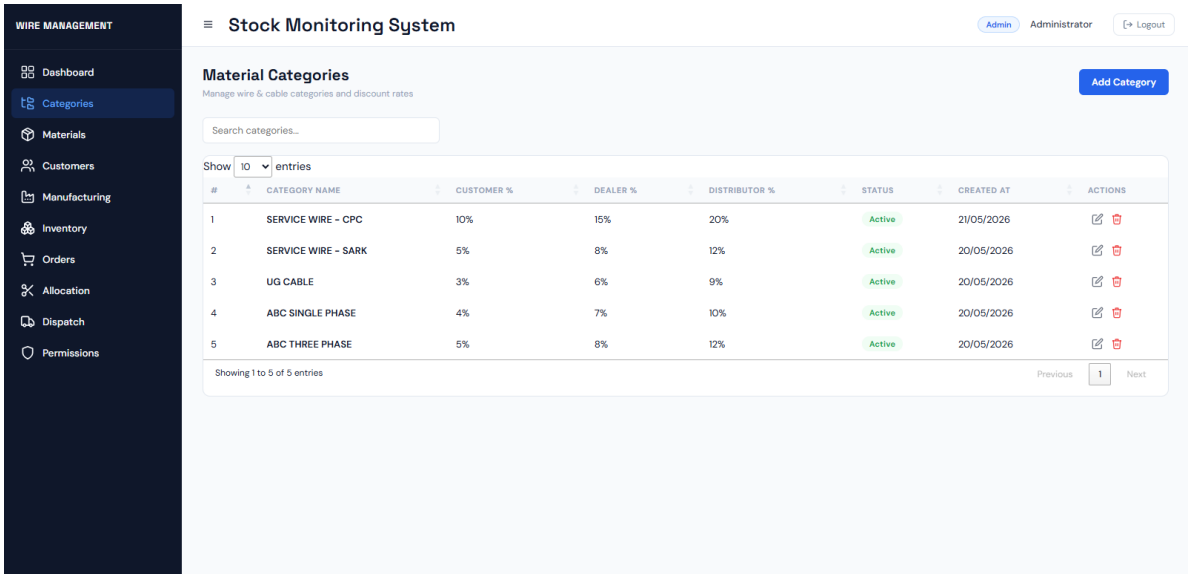

5. Important Notes

- Only authorized users can access restricted modules.
- Mandatory fields are marked with * in forms.
- Once dispatch is completed, records may become non-editable depending on permissions.
- Dashboard values update automatically based on system transactions.

6. Categories Module

The Categories module is used to manage wire and cable categories and their discount percentages.

Categories Listing Screen

This screen displays:

- Category Name
- Customer %
- Dealer %
- Distributor %
- Status
- Created Date
-

Users can also:

- Search categories
- Add new categories
- Edit existing categories
- Delete categories

Add Category

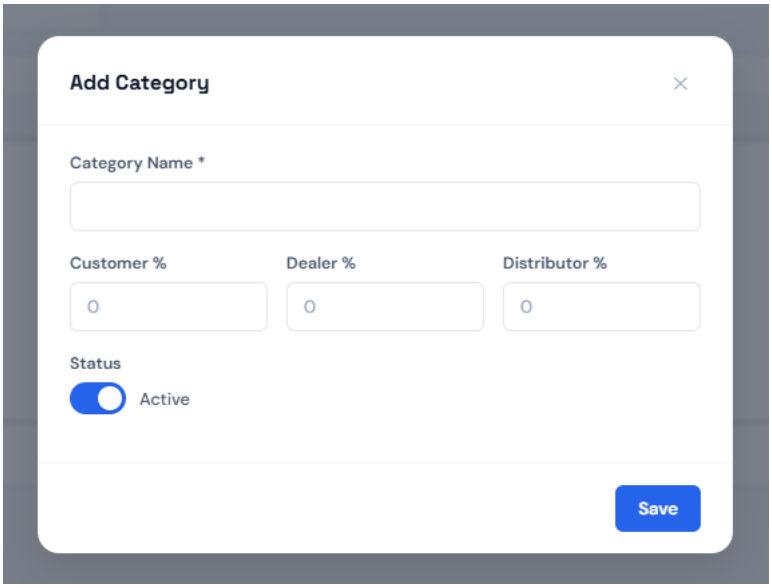

Steps to Add Category

Step 1:

Go to: Menu → Categories

Step 2:

Click on Add Category.

Step 3: Enter the following

Category Name

Customer %

Dealer %

Distributor %

Status

Step 4:

Click on Save.

Edit Category

Click on the Edit icon.

Update the details.

Click Save.

Delete Category

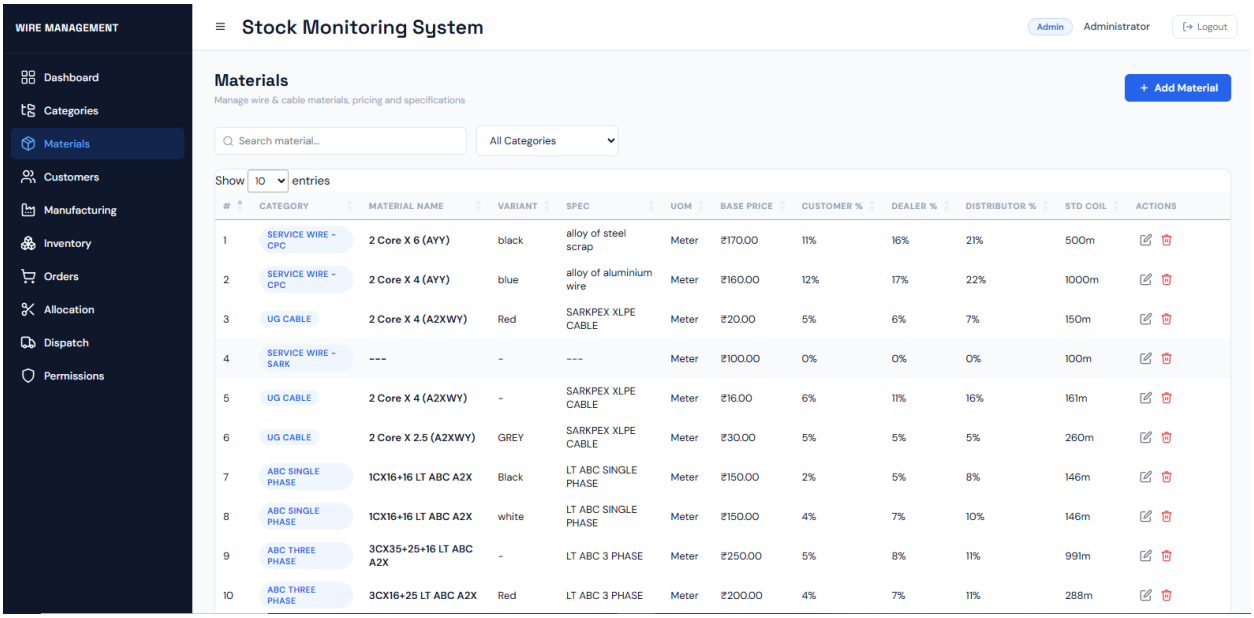

Click on the  Delete icon.

Confirm deletion.

7. Materials Module

The Materials module is used to manage wire and cable materials along with pricing, specifications, and discount details.

Materials Listing Screen

This screen displays:

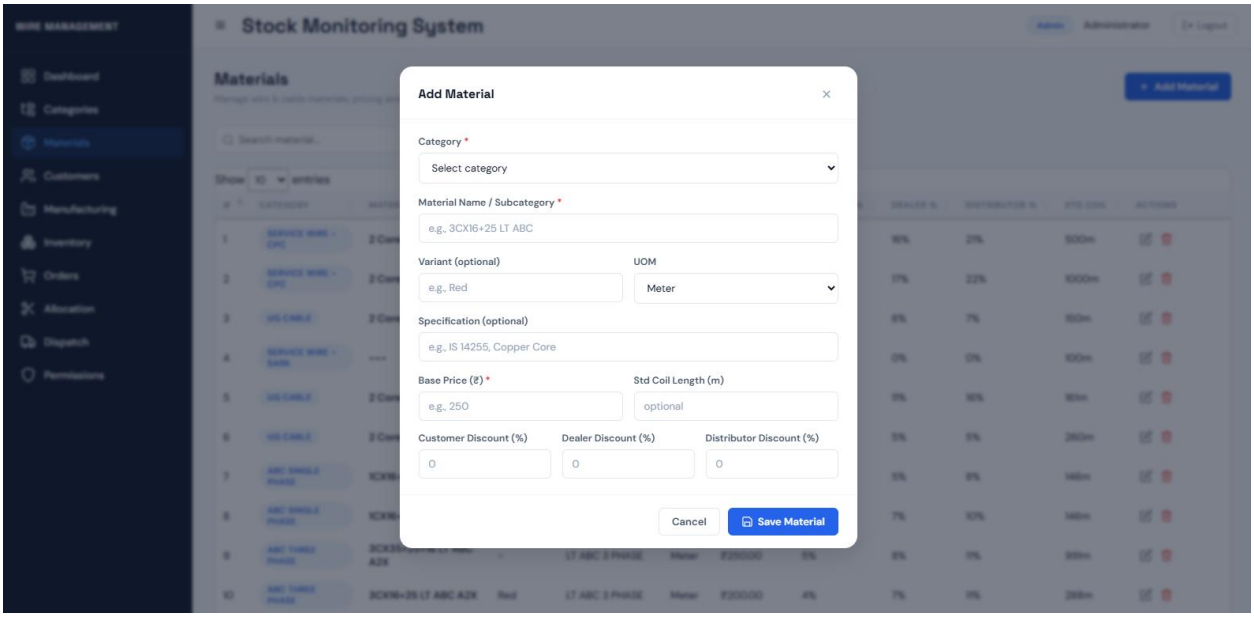

- Category
- Material Name
- Variant
- Specification
- UOM
- Base Price
- Customer Discount
- Dealer Discount
- Distributor Discount
- Standard Coil Length

Users can also:

- Search materials
- Filter by category
- Add new materials

- Edit materials
- Delete materials

Add Material

Steps to Add Material

Step 1:

Go to: Menu → Materials

Step 2:

Click on **Add Material**.

Step 3:

Enter:

- Category
- Material Name
- Variant
- UOM
- Specification
- Base Price
- Std Coil Length
- Customer Discount

- Dealer Discount
- Distributor Discount

Step 4:

Click on **Save Material**.

Edit Material

- Click on the  Edit icon.
- Update the details.
- Click **Save**.

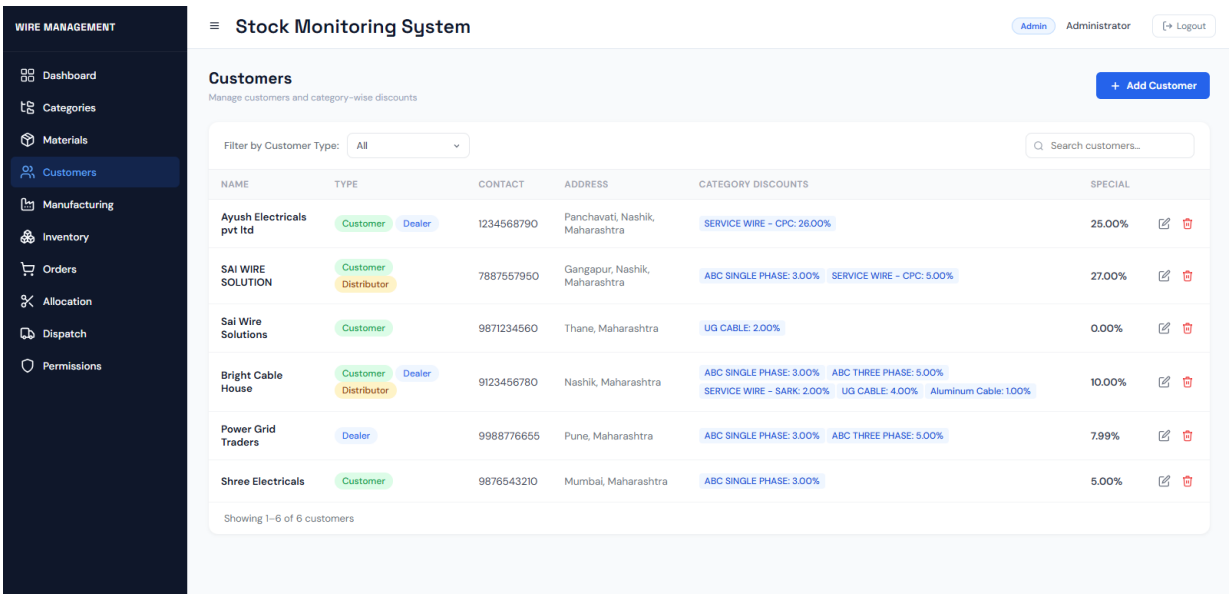

Delete Material

- Click on the  Delete icon.
- Confirm deletion.

8. Customers Module

The Customer's module is used to manage customer details, customer types, and category-wise discounts.

Customers Screen

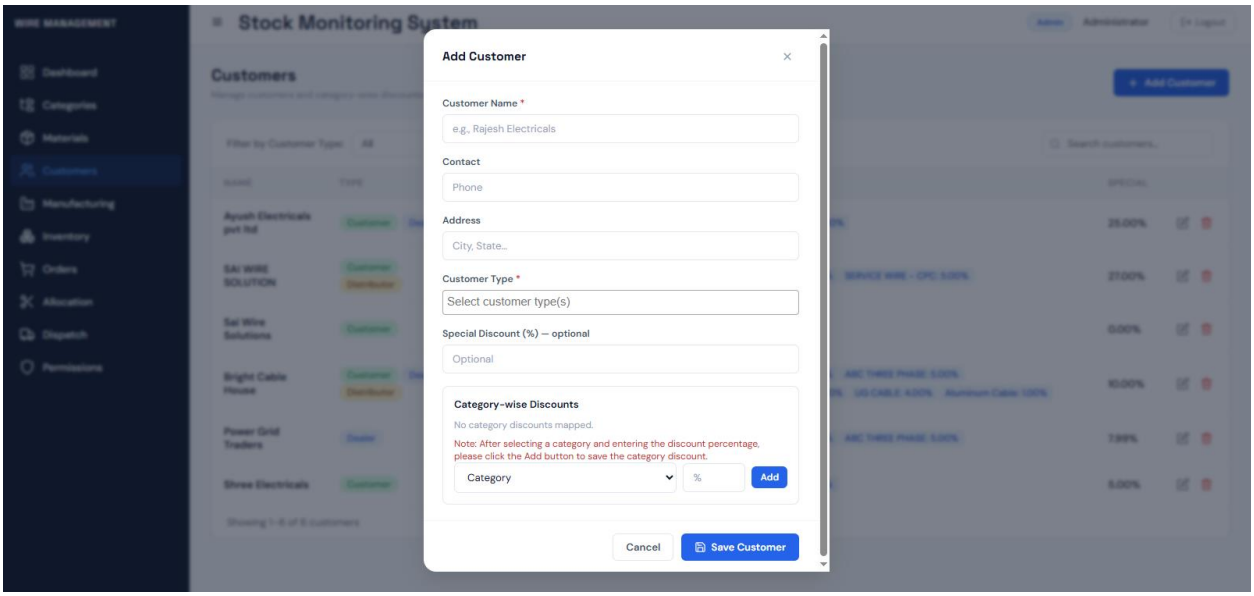

This screen displays:

- Customer Name
- Customer Type
- Contact Details
- Address
- Category Discounts
- Special Discount

Users can also:

- Search customers
- Filter by customer type
- Add customers
- Edit customer details
- Delete customers

Add Customer

Steps to Add Customer

Step 1:

Go to: Menu → Customers

Step 2:

Click on **Add Customer**.

Step 3:

Enter:

- Customer Name
- Contact Number
- Address
- Customer Type
- Special Discount
- Category-wise Discount

Step 4:

Click on **Save Customer**.

Edit Material

- Click on the  Edit icon.
- Update the details.
- Click **Save**.

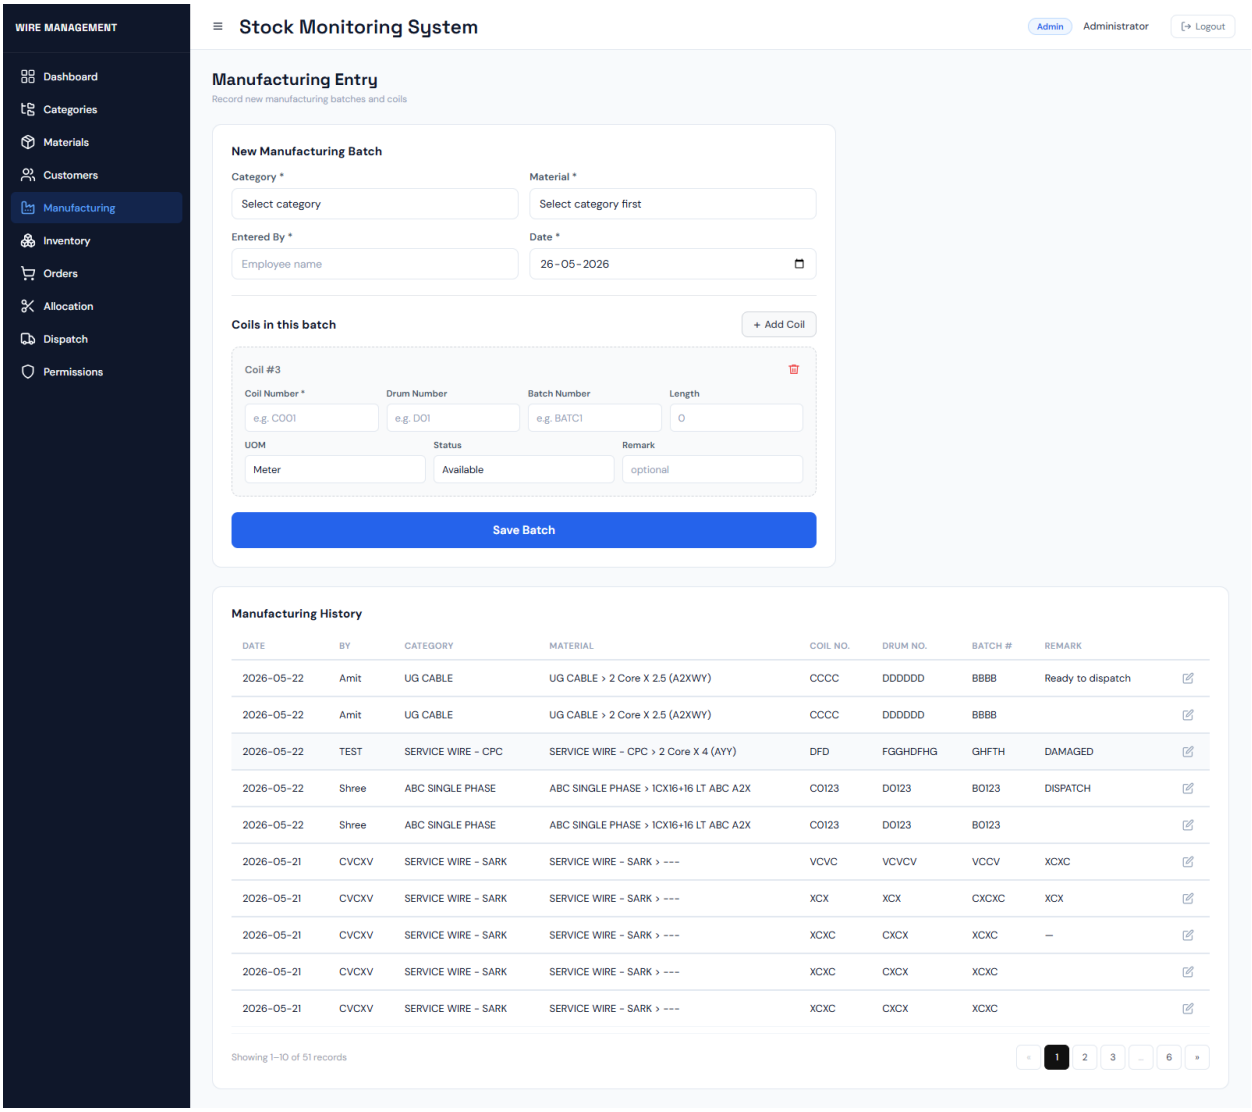

Delete Material

- Click on the  Delete icon.
- Confirm deletion.

9. Manufacturing Module

The **Manufacturing** module is used to record new manufacturing batches and manage coil-wise manufacturing details.

Manufacturing Entry Screen

This screen is used to add a new manufacturing batch with coil details.

This screen displays:

New Manufacturing Batch Details

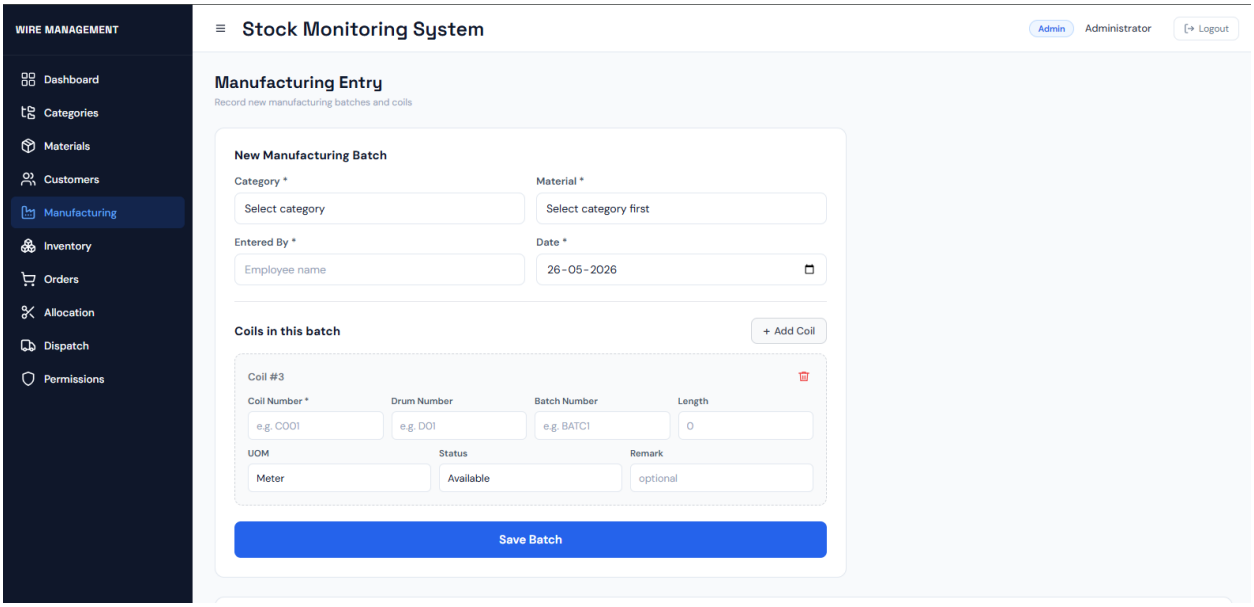

- Category
- Material
- Entered By
- Date

Coils in this Batch

- Coil Number
- Drum Number
- Batch Number
- Length
- UOM
- Status
- Remark

Users can:

- Select category
- Select material based on category
- Add one or more coils in a batch
- Remove coil entry
- Save manufacturing batch

Steps to Add Manufacturing Batch

Step 1:

Go to: Menu → Manufacturing

Step 2:

Select the required **Category**.

Step 3:

Select the **Material** related to the selected category.

Step 4:

Enter the employee's name in **Entered By**.

Step 5:

Select or confirm the **Date**.

Step 6:

Under **Coils in this batch**, enter coil details:

- Coil Number
- Drum Number
- Batch Number
- Length
- UOM
- Status
- Remark

Step 7:

To add more coils, click on:

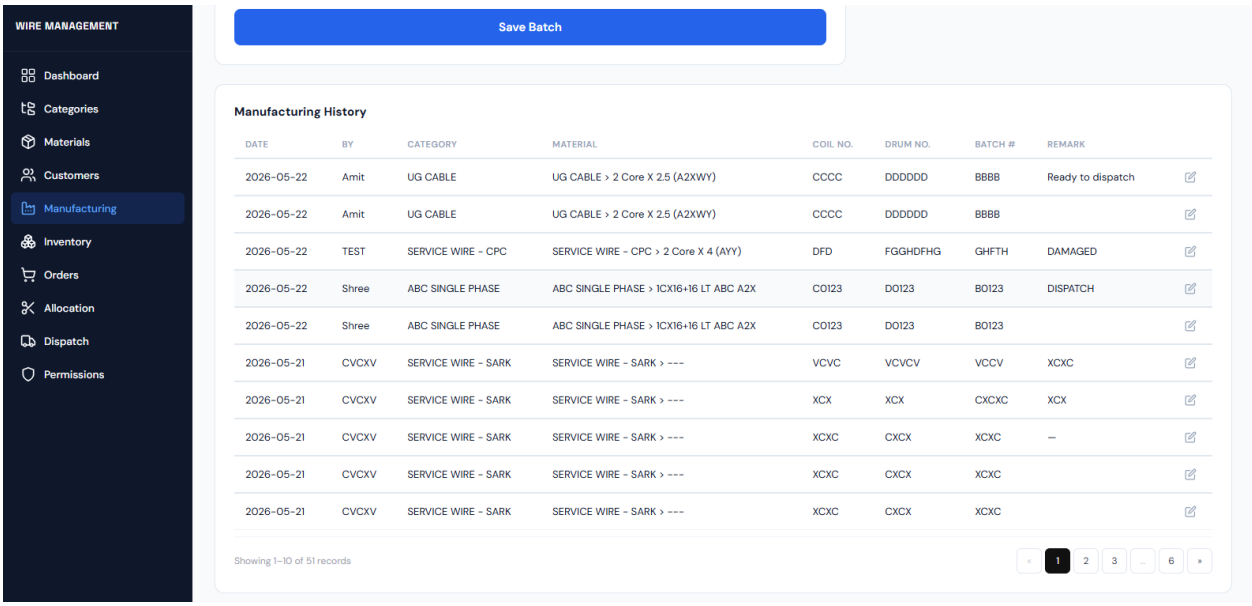

+ Add Coil

Step 8:

Click on:

Save Batch

Manufacturing History Screen

This screen displays all saved manufacturing records.

The table displays:

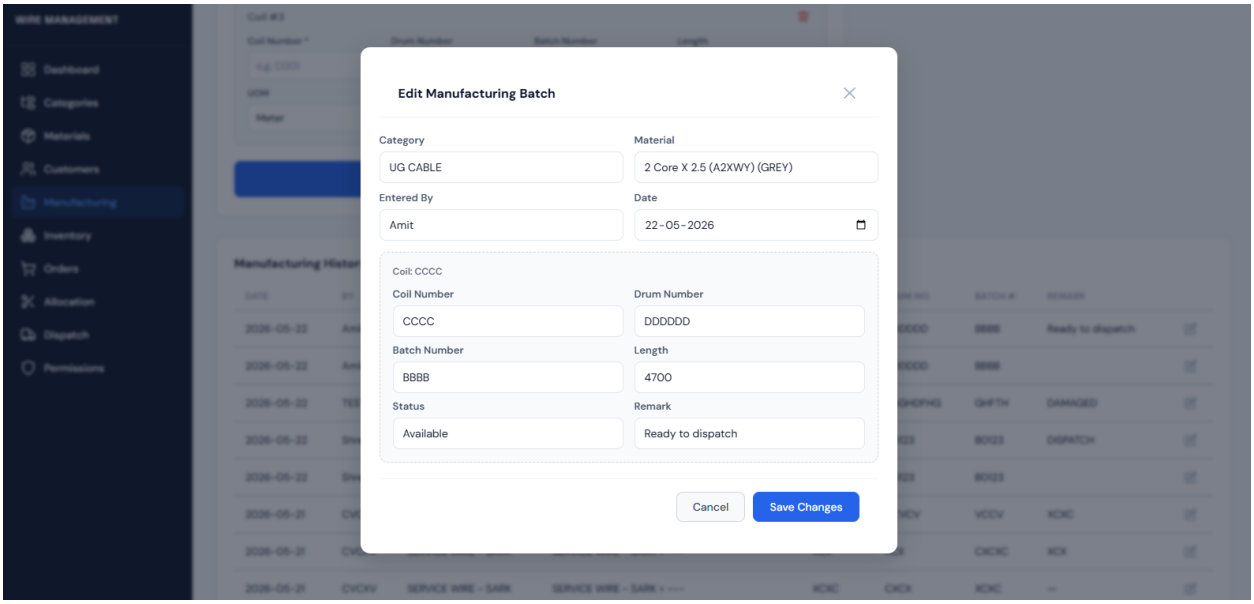

- Date
- By
- Category
- Material
- Coil No.
- Drum No.
- Batch #
- Remark

Users can also:

- View manufacturing history
- Check previously added coil details
- Edit manufacturing records using the ✏ edit icon
- Navigate records using pagination

Edit Manufacturing Entry

1. Go to the **Manufacturing History** table.
2. Click on the Edit icon.
3. Update the required manufacturing or coil details.

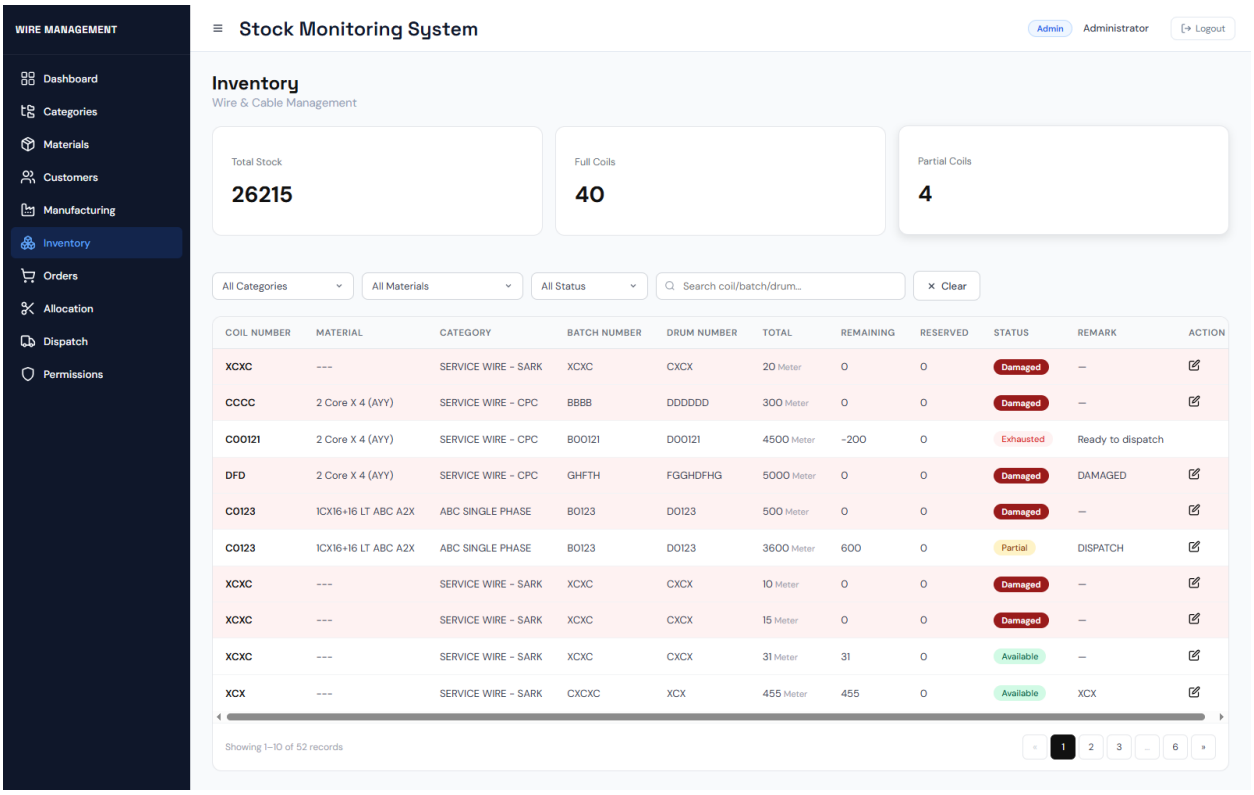

4. Click on **Save Batch**.

10. Inventory Module

The Inventory module is used to manage wire & cable stock, monitor available inventory, track damaged or partial coils, and maintain batch/drum-wise stock details.

Inventory Listing Screen

This screen displays:

- Coil Number
- Material Name
- Category
- Batch Number
- Drum Number
- Total Quantity
- Remaining Quantity
- Reserved Quantity
- Stock Status
- Remarks

The dashboard also displays:

- Total Stock
- Full Coils
- Partial Coils

Users can also:

- Search inventory by coil/batch/drum number
- Filter by category
- Filter by material
- Filter by status
- View stock availability
- Edit inventory details

Users can filter inventory using:

- Category Filter
- Material Filter
- Status Filter
- Search Bar

The search option helps users quickly find:

- Coil Number
- Batch Number
- Drum Number

The system supports multiple inventory statuses such as:

- Available
- Partial
- Damaged
- Exhausted

These statuses help users identify the current condition and usability of stock items.

Edit Coil

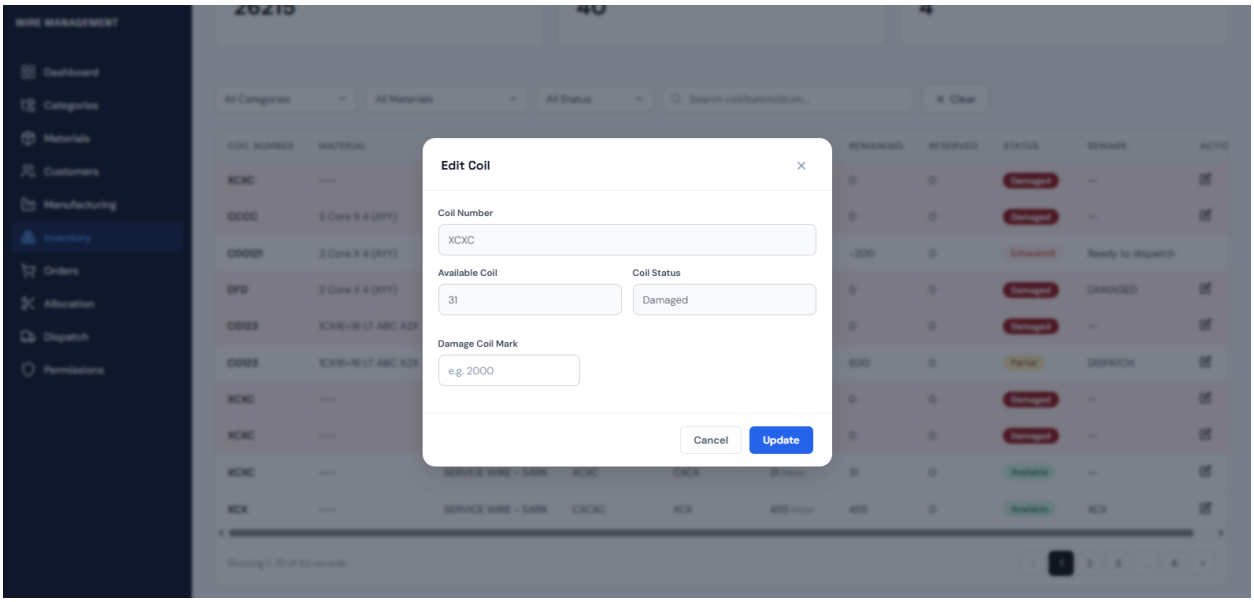

The Edit Coil option is used to mark damaged coil length in the inventory.
If any portion of the coil is damaged, users can select the coil from the inventory list, click on the Edit icon, and enter the damaged length. The system automatically updates the available coil quantity and changes the coil status accordingly.

The popup contains:

- Coil Number
- Available Coil Length
- Coil Status
- Damaged Coil Length

Users can also:

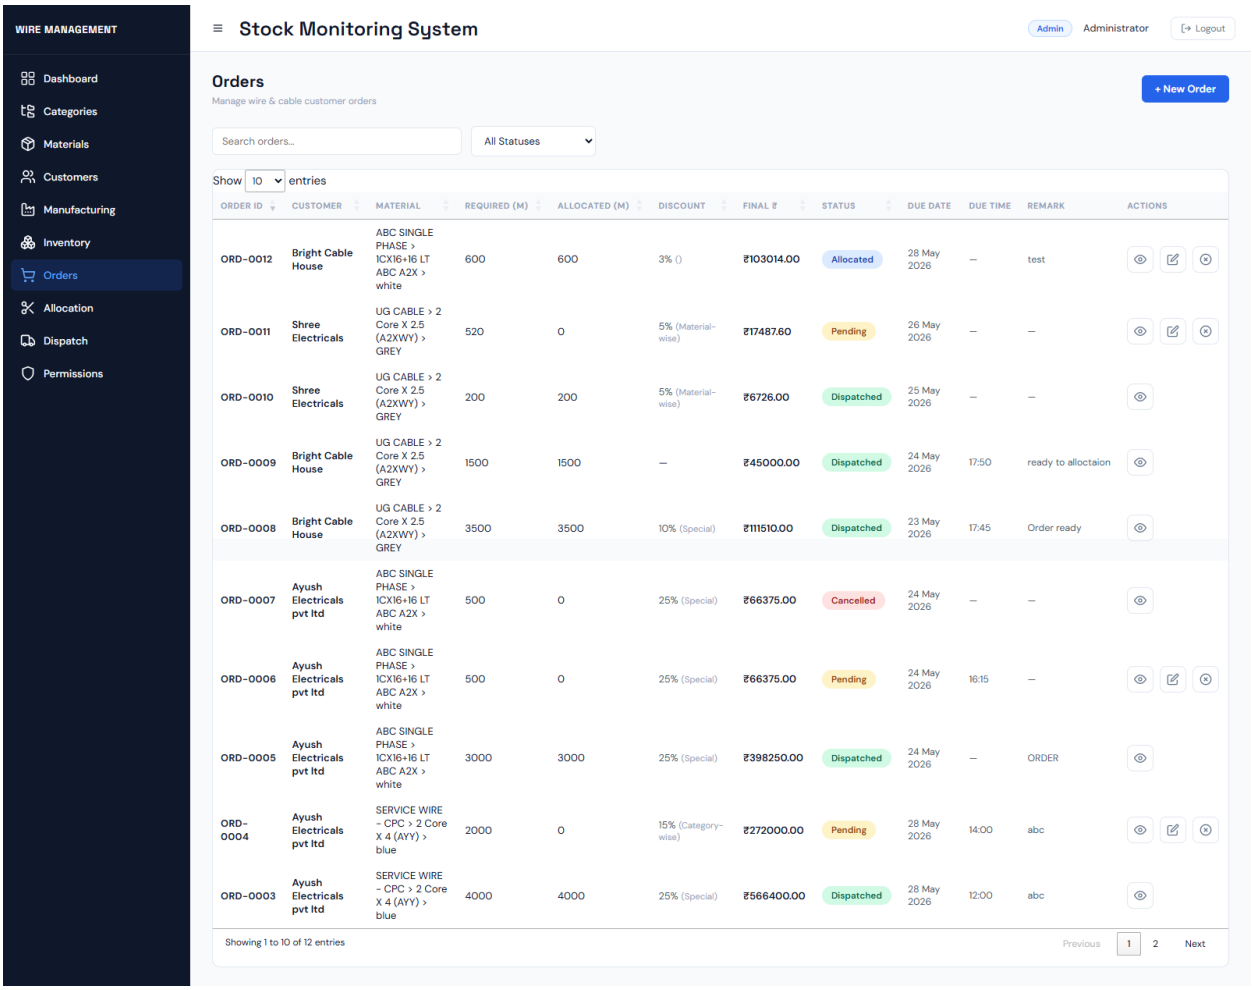

- Mark damaged coil quantity
- Update coil status
- Save inventory changes
- Cancel updates

11. Orders Module

The Orders module is used to create, manage, and track customer wire & cable orders. It helps users monitor order quantity, allocation status, pricing, discounts, GST, and dispatch progress.

Orders Listing Screen

This screen displays:

- Order ID
- Customer Name
- Material Details
- Required Quantity
- Allocated Quantity
- Discount Details
- Final Amount

- Order Status
- Due Date
- Due Time
- Remarks

Users can also:

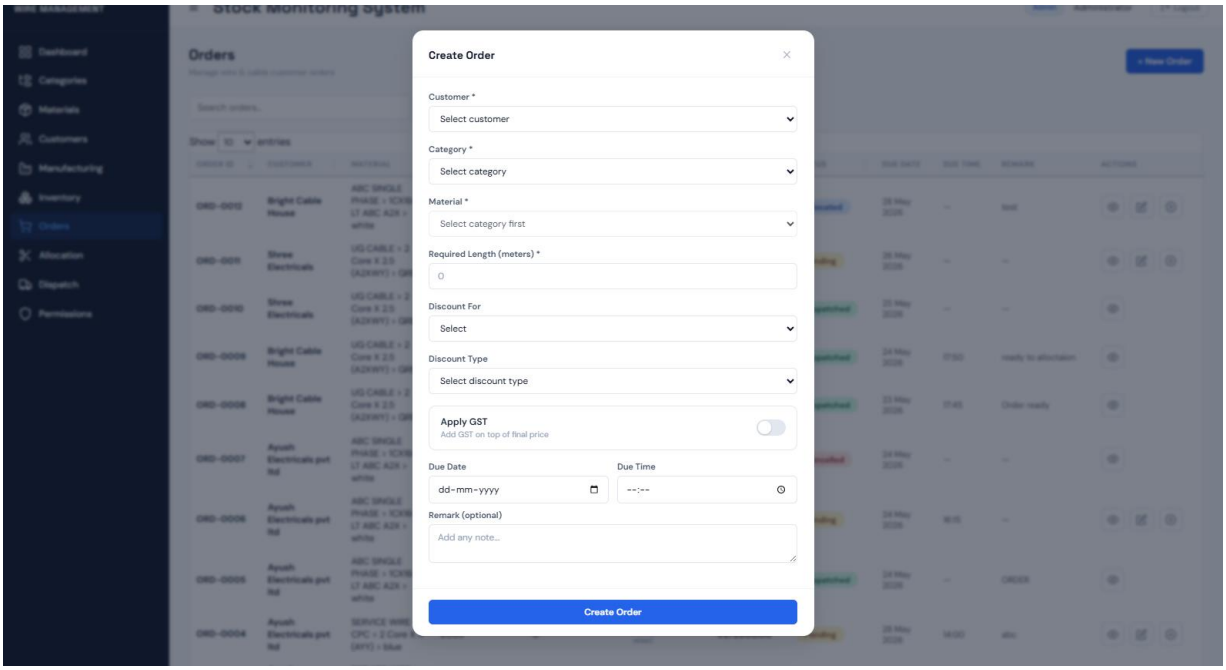

- Search orders
- Filter orders by status
- Create new orders
- View order details
- Edit orders
- Cancel orders

The system supports multiple order statuses such as:

- Pending
- Allocated
- Dispatched
- Cancelled

These statuses help users track the current progress of customer orders.

Create Order

The Create Order popup is used to create a new customer order for wire & cable materials.

The popup contains:

- Customer Selection
- Category Selection
- Material Selection
- Required Length (meters)
- Discount For (Customer, Dealer and Distributor)
- Discount Type
- GST Option
- Due Date
- Due Time
- Remarks

Users can also:

- Apply Material-wise discount
- Apply category-wise discount
- Apply customer-wise discount
- Apply special discount
- Apply Manul discount
- Enable GST calculation
- Add remarks or notes
- Create customer orders

Steps to Create Order

Step 1:

Go to: Menu → Orders

Step 2:

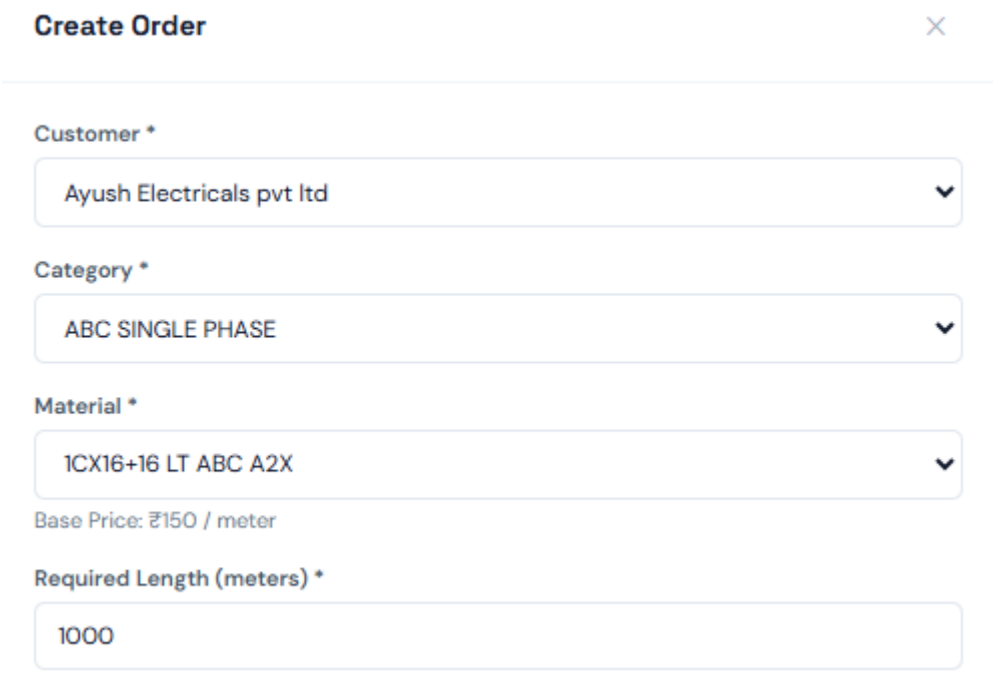

Click on + New Order.

Step 3:

Select or enter:

- Customer
- Category
- Material

- Required Length

Step 4:

Select Discount Details:

- Discount For

This will show the below selection based on Customer Master.
Example: If customer is marked as “Customer” and “Dealer” than only this two will be shown and If customer is marked all three i.e. “Customer”, “Dealer” and “Distributor” than all the three will be shown while making the selection

  - Customer
  - Dealer
  - Distributor

- Discount Type

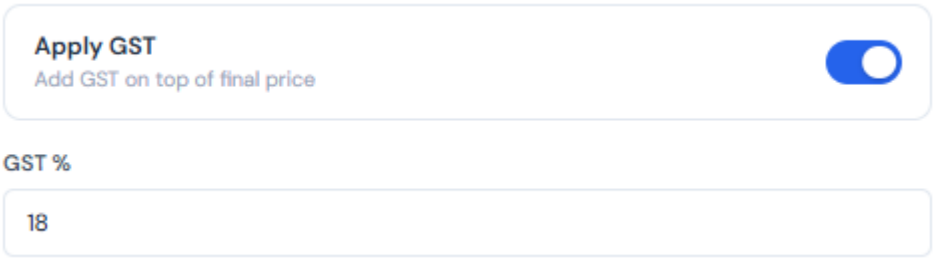

User Can give add discount to the order based on the Discount Type. Material wise or Category wise discounts will be taken directly from material and category master. Specai and Customer wise discounts will be taken from customer master.

- Apply Material-wise discount
- Apply category-wise discount
- Apply customer-wise discount
- Apply special discount
- Apply Manul discount

Step 5:

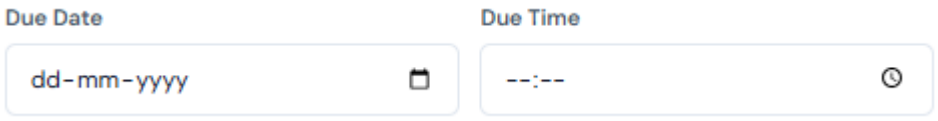

Enable Apply GST if GST needs to be added to the final price.

Step 6:

Select:

- Due Date
- Due Time

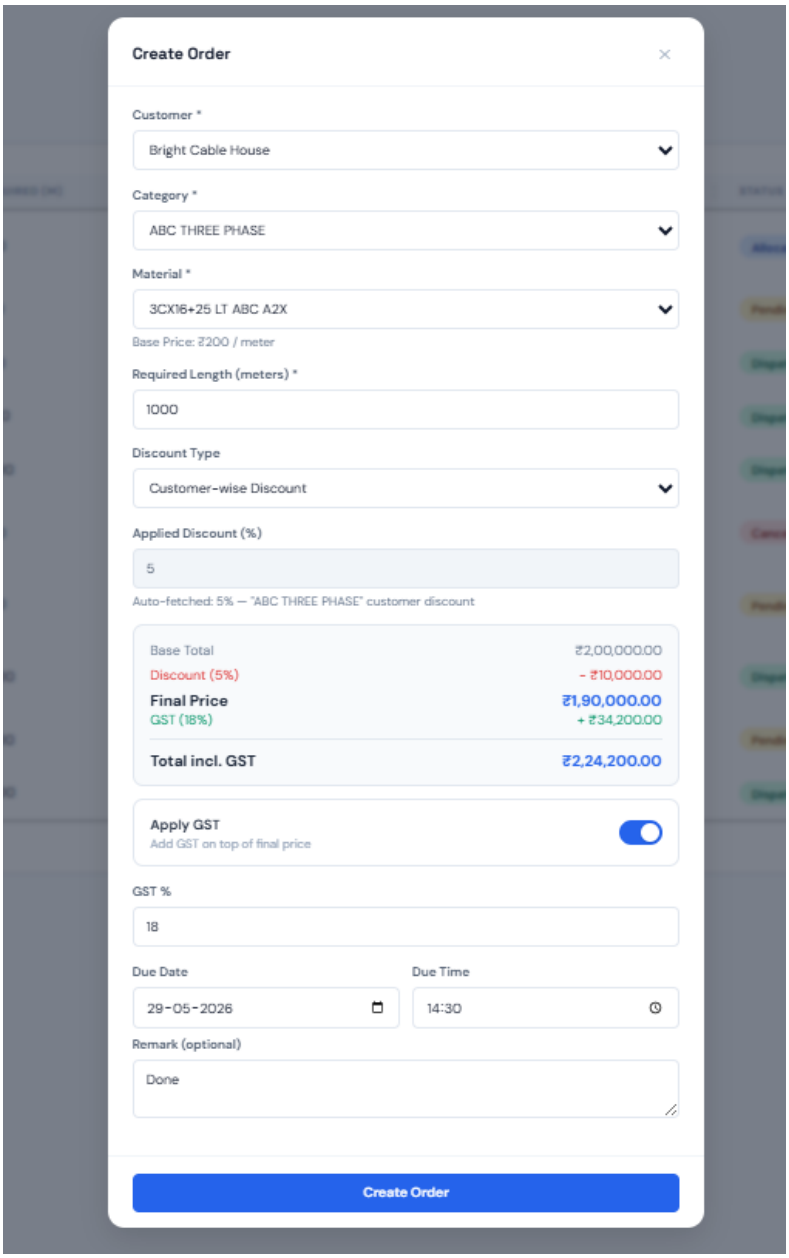

Step 7:

Enter remarks if required.

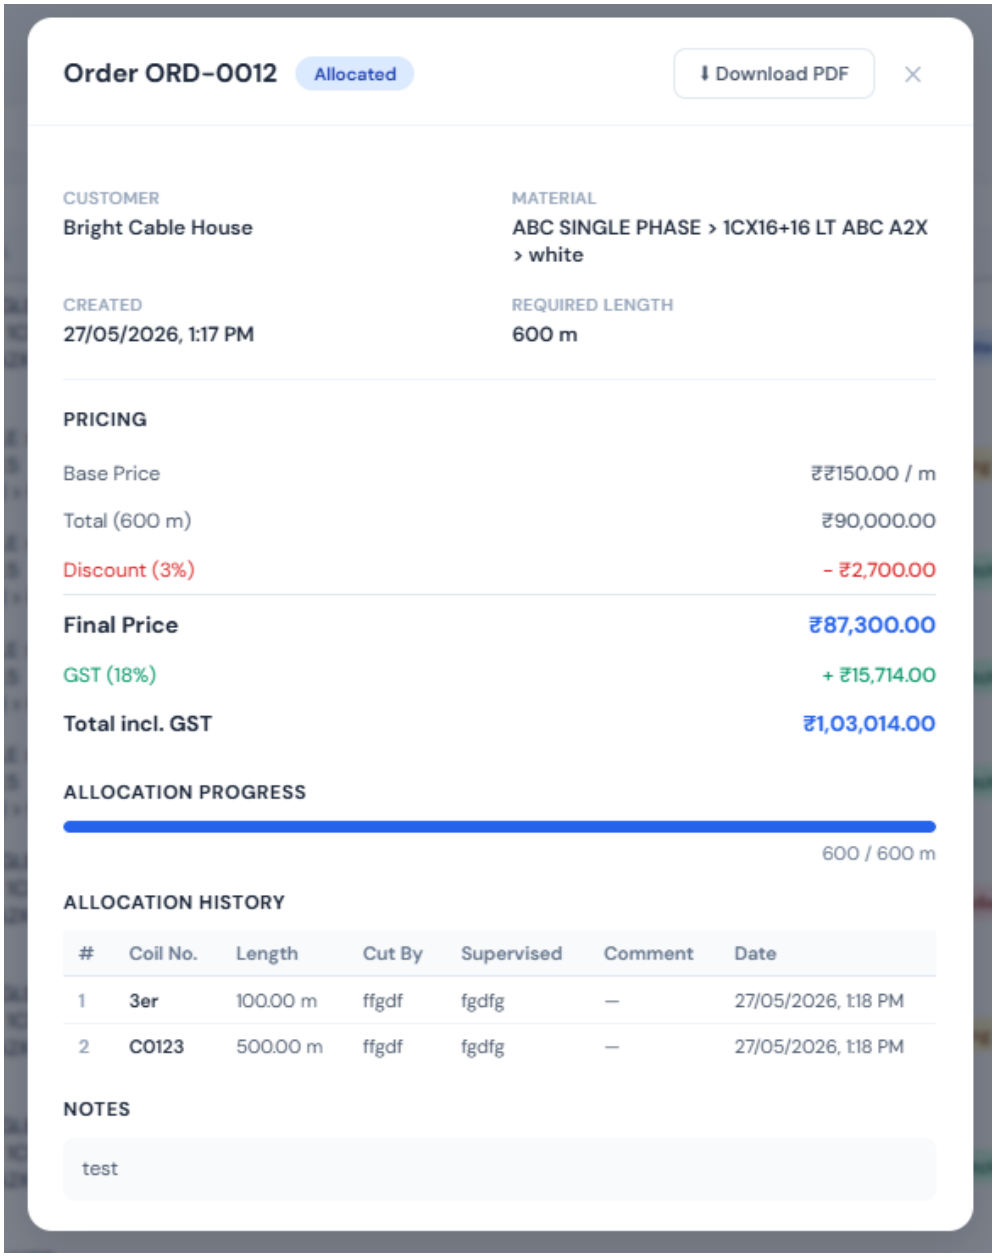

Step 8:

Click on Create Order.

View Order Details

The Order Details popup is used to view complete order information, pricing details, allocation of progress, and allocation history.

This popup displays:

- Order ID
- Customer Details

- Material Details
- Required Length
- Pricing Information
- Discount Calculation
- GST Calculation
- Final Amount
- Allocation Progress
- Allocation History
- Notes / Remarks

Users can also:

- Track allocation progress
- View allocated coil details
- Check pricing breakdown
- Download order PDF

Allocation History

The Allocation History section displays:

- Coil Number
- Allocated Length
- Cut By
- Supervised By
- Comments
- Allocation Date & Time

This helps users track which coils were used for fulfilling the order.

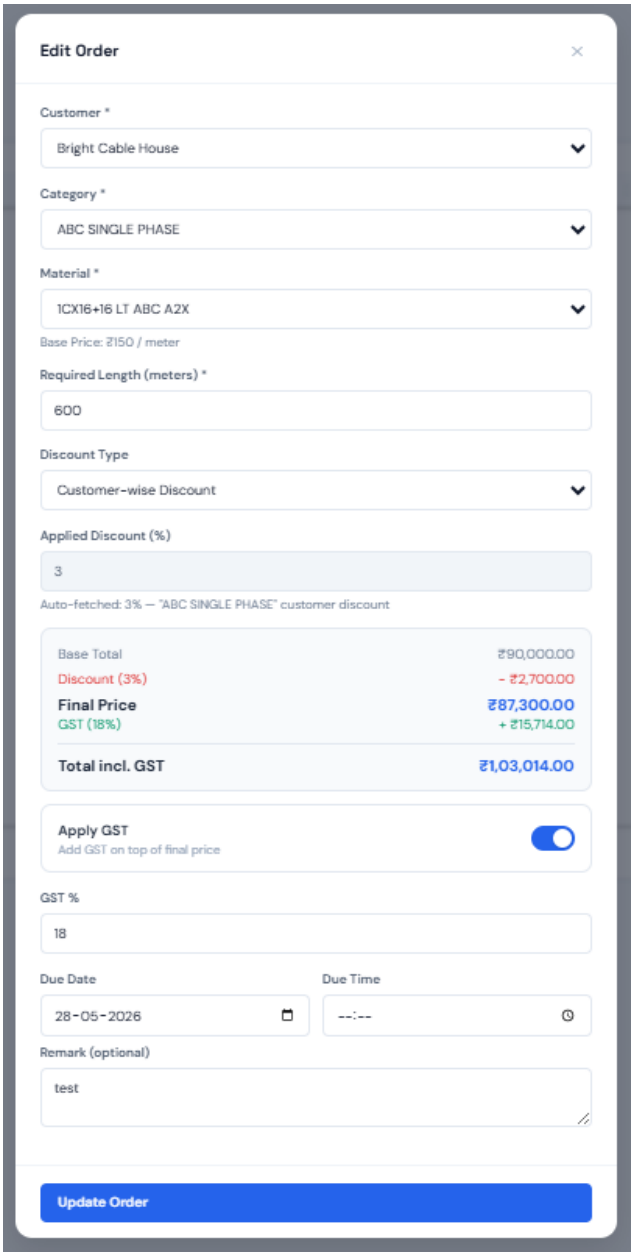

Pricing Calculation

The system automatically calculates:

- Base Price
- Total Price
- Discount Amount
- GST Amount
- Final Amount Including GST

This helps maintain accurate order pricing and billing.

Edit Order

The Edit Order popup is used to modify existing order details, pricing configuration, discounts, GST settings, and delivery information.

This popup allows users to:

- Update customer details
- Change material category and material
- Modify required length

- Apply or change discount type
- View updated pricing calculation
- Enable or disable GST
- Update due date and time
- Add or edit remarks

Order Information

The popup contains the following fields:

- Customer
- Category
- Material
- Required Length (meters)
- Discount Type
- Applied Discount (%)
- GST Option
- GST Percentage
- Due Date
- Due Time
- Remarks / Notes

Pricing Calculation

The system automatically recalculates pricing whenever order details are updated.

The pricing section displays:

Base Total
Discount Amount
Final Price
GST Amount
Total Including GST

This helps users verify pricing accuracy before updating the order.

Discount Handling

The system supports different discount configurations such as:

- Customer-wise Discount
- Category-wise Discount
- Material-wise Discount

- Special Discount
- Manual Discount

Applied discounts are automatically fetched and displayed based on the selected configuration.

GST Calculation

Users can:

Enable or disable GST
Apply GST percentage
View GST amount separately

The final order value is automatically updated after GST calculation.

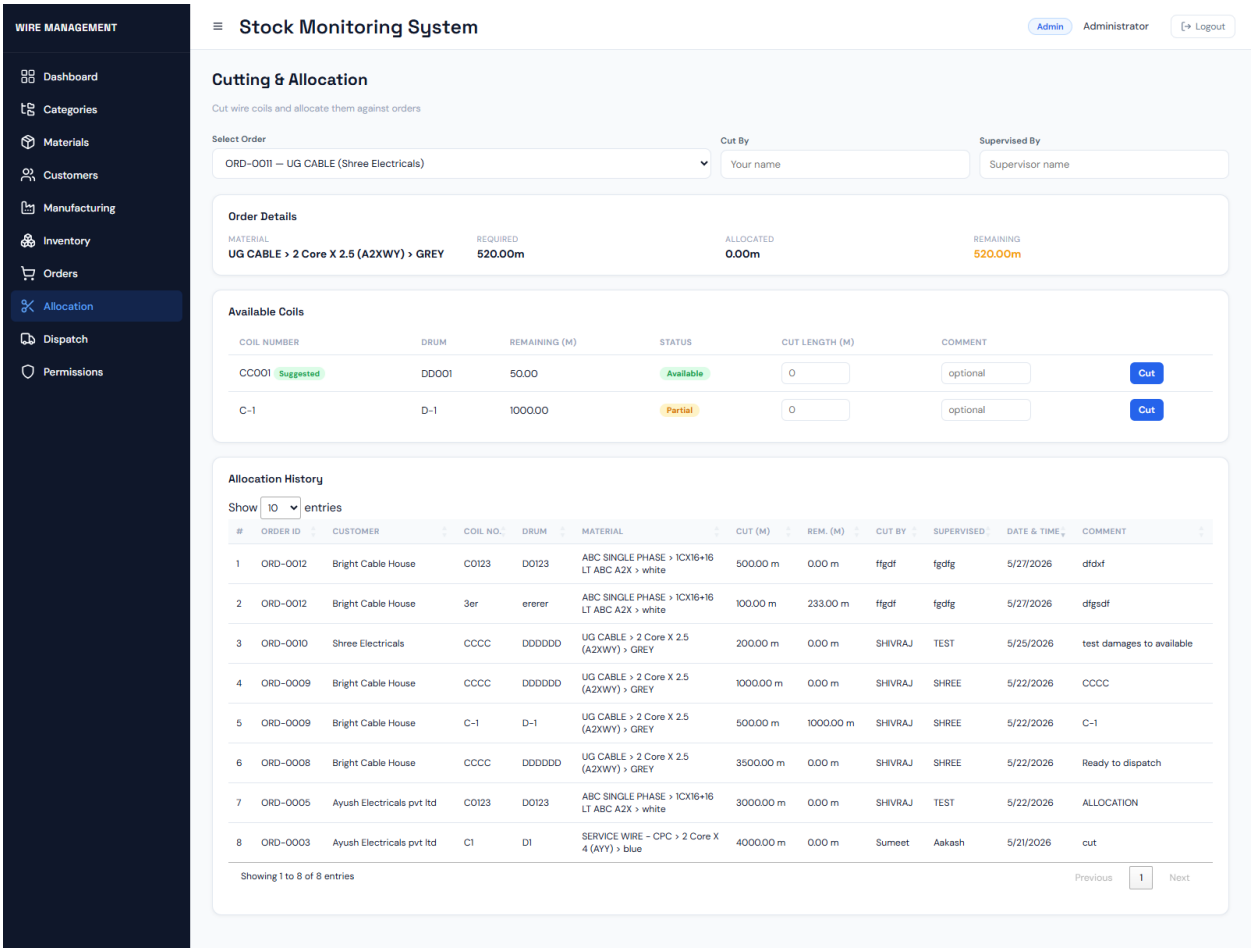

Order Update

After verifying all details, users can click the **Update Order** button to save the modified order information.

12. Allocation Module

The Allocation module is used to cut wire coils and allocate material against customer orders.

Allocation

This screen displays:

- Order Details
- Available Coils
- Allocation History

Users can:

- Select orders
- Enter cut length
- Allocate coils

- Add comments
- Track allocation history

Cut & Allocate Material

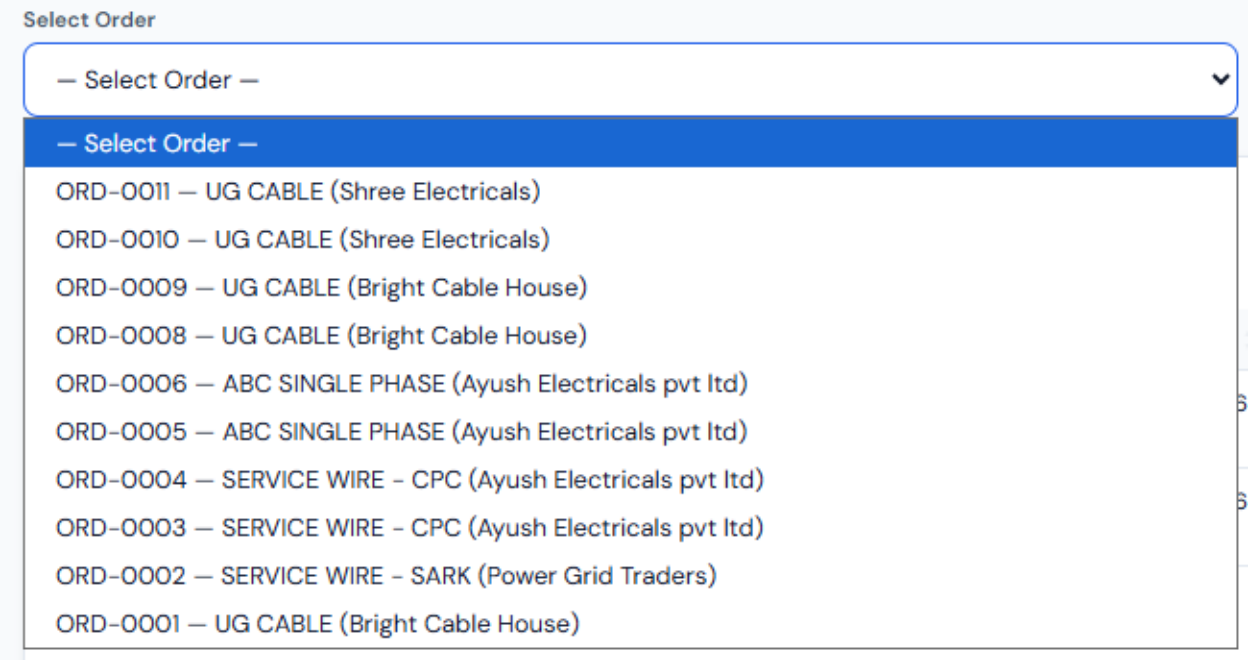

Steps for Allocation

Step 1:

Go to: Menu → Allocation

Step 2:

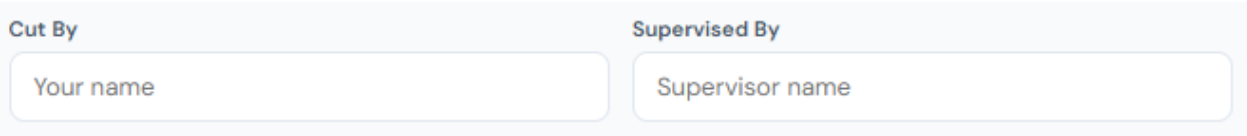

Select the required order from the dropdown.

Step 3:

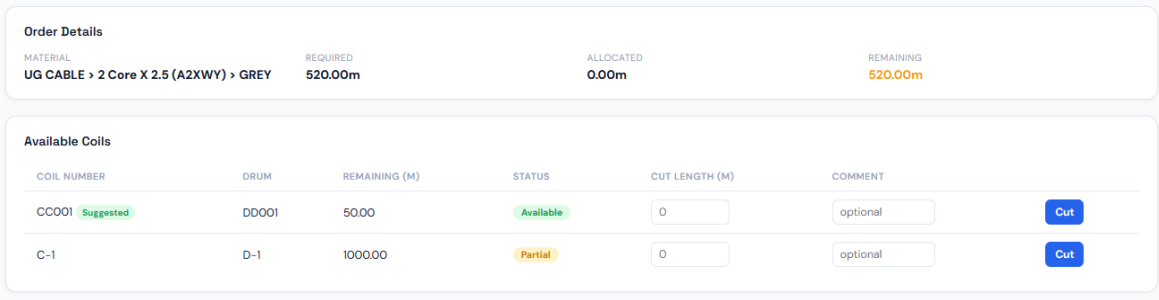

Enter:

- Cut By
- Supervised By

Step 4:

Select the coil and enter the cut length.

Step 5:

(Optional) Add comments.

Step 6:

Click on **Cut**.

Allocation History

The Allocation History section shows:

- Order ID
- Customer
- Coil Number
- Drum
- Material
- Cut Length
- Remaining Length
- Cut By
- Supervised
- Date & Time
- Comments

Allocation History

13. Dispatch Module

The Dispatch module is used to dispatch allocated orders and maintain dispatch records.

Dispatch Screen

This screen displays:

- Order Details
- Customer Information
- Allocated Quantity
- Dispatch Status
- Dispatch History

Users can also:

- Select orders
- Enter dispatch details

- Add remarks
- Track dispatch history

Create Dispatch

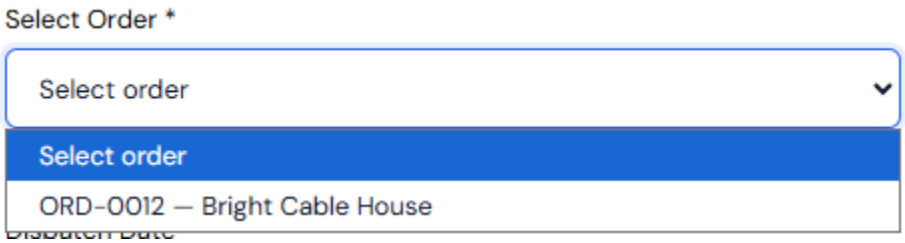

Steps for Dispatch

Step 1:

Go to: Menu → Dispatch

Step 2:

Select the order from the dropdown.

Step 3:

Verify:

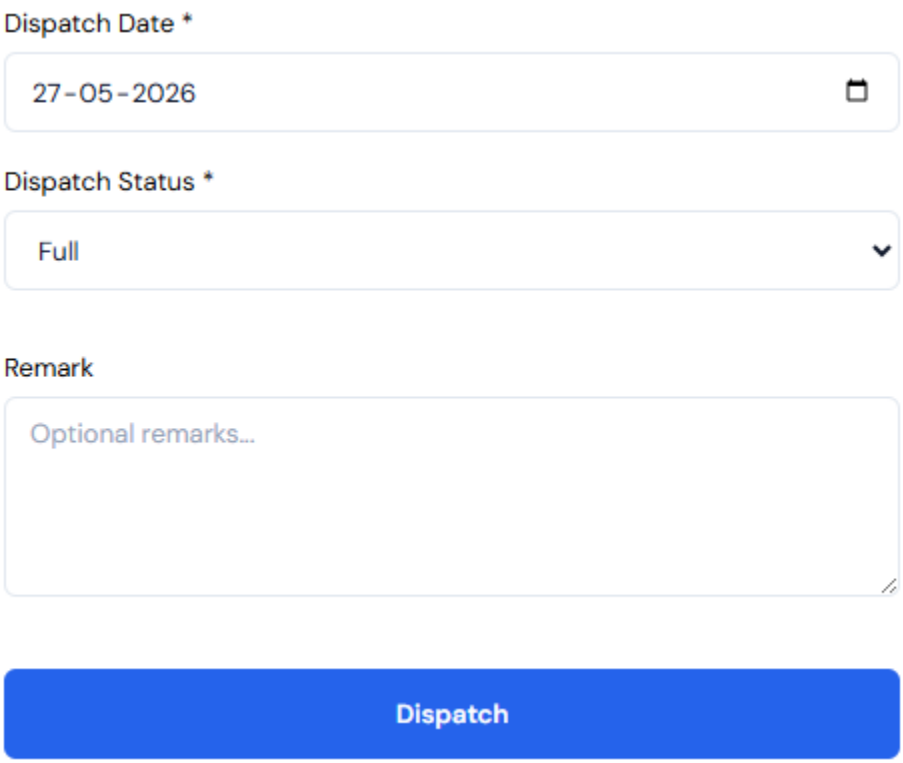

- Customer Name
- Material Details
- Allocated Quantity

Step 4:

Enter:

- Dispatch Date
- Dispatch Status
- Remarks (Optional)

Step 5:

Click on **Dispatch**.

Dispatch History

The Dispatch History section shows:

- Order ID
- Customer
- Dispatch Date
- Status

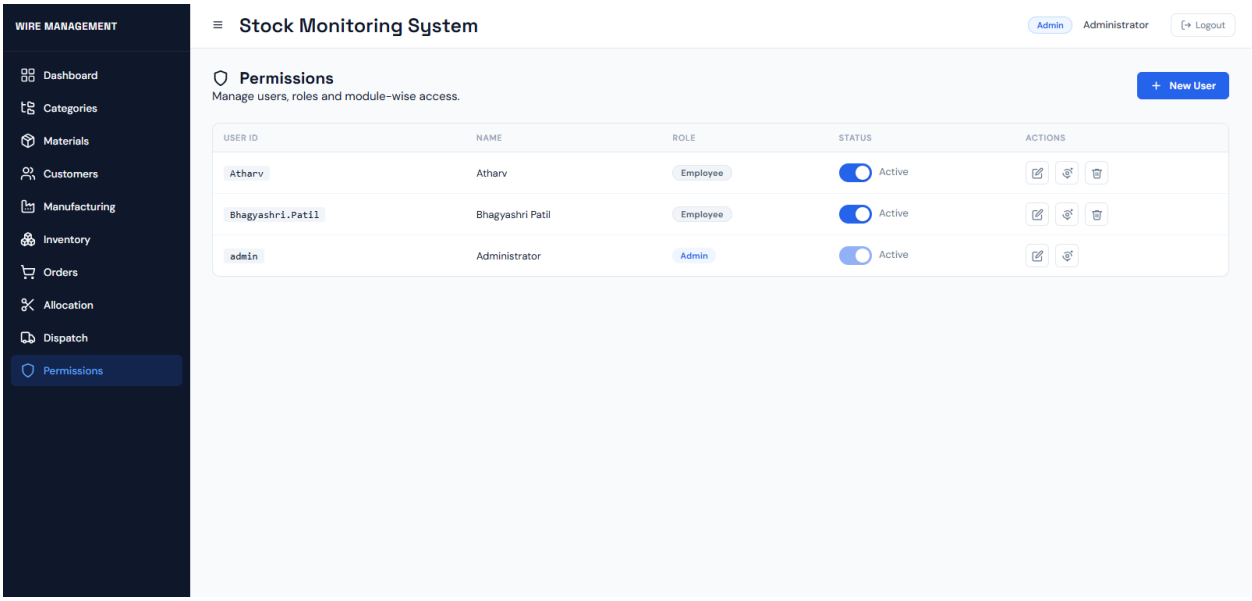

- Remarks
- Created Date
- Created By

14. Permissions Module

The Permissions module is used to manage users, roles, and module-wise access permissions.

Permissions Screen

This screen displays:

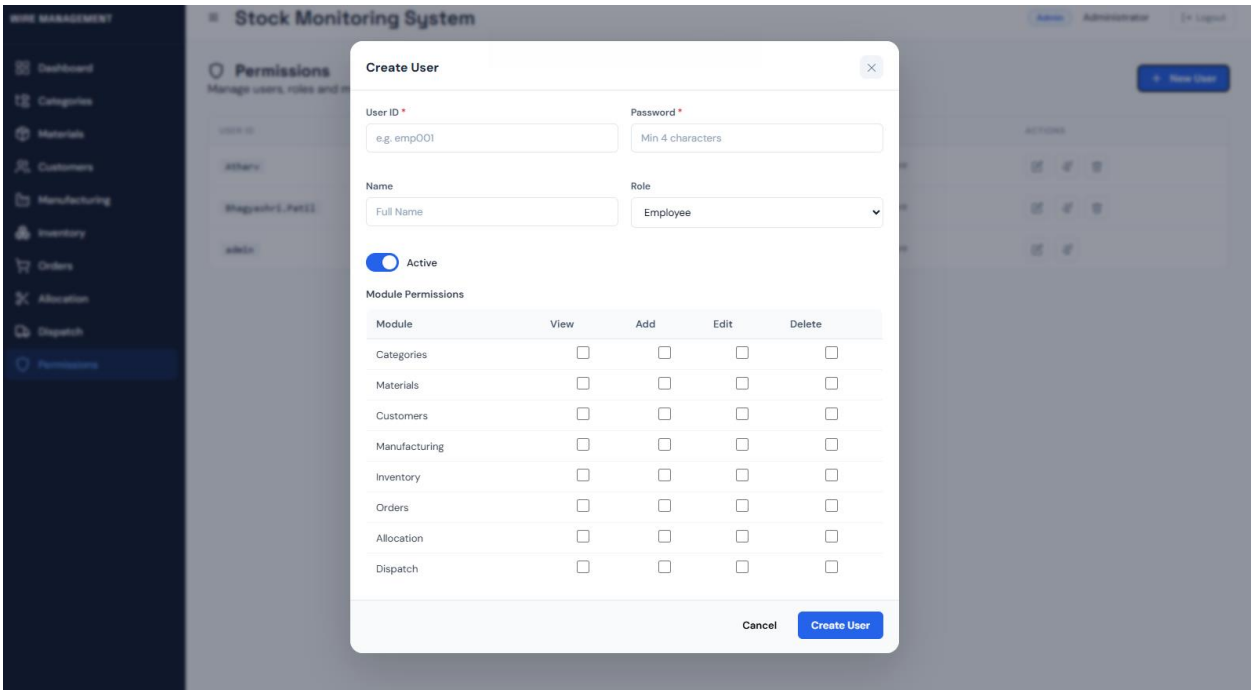

- User ID
- Username
- Role
- Status

Users can also:

- Create new users
- Edit users
- View permissions
- Delete users
- Activate or deactivate users

Create User

Create User Popup

Steps to Create User

Step 1:

Go to: Menu → Permissions

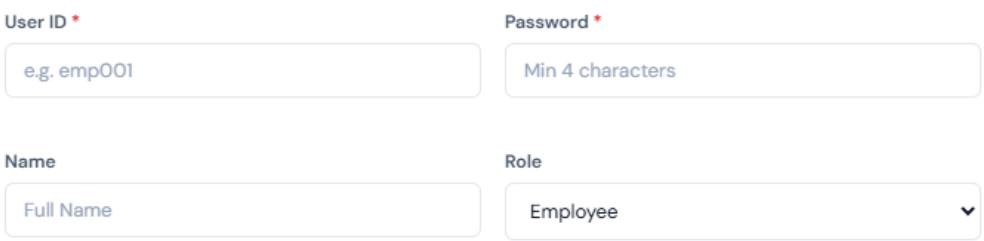

Step 2:

Click on **New User**.

Step 3:

Enter:

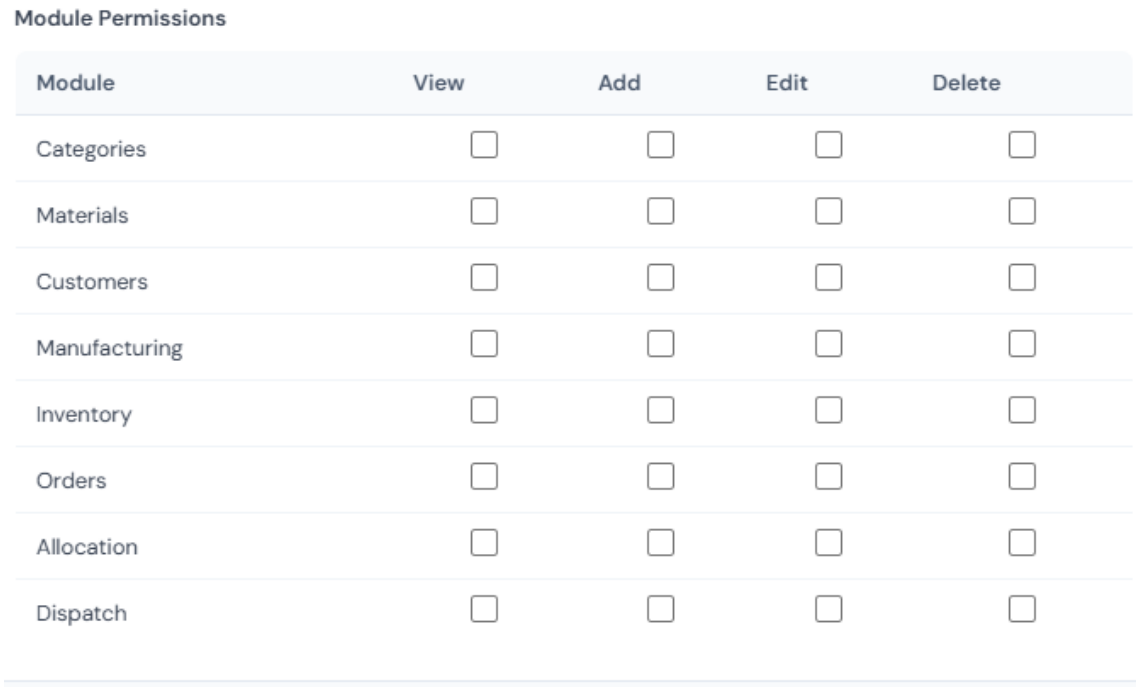

- User ID
- Password
- Name
- Role

Step 4:

Select module permissions:

- View
- Add
- Edit
- Delete

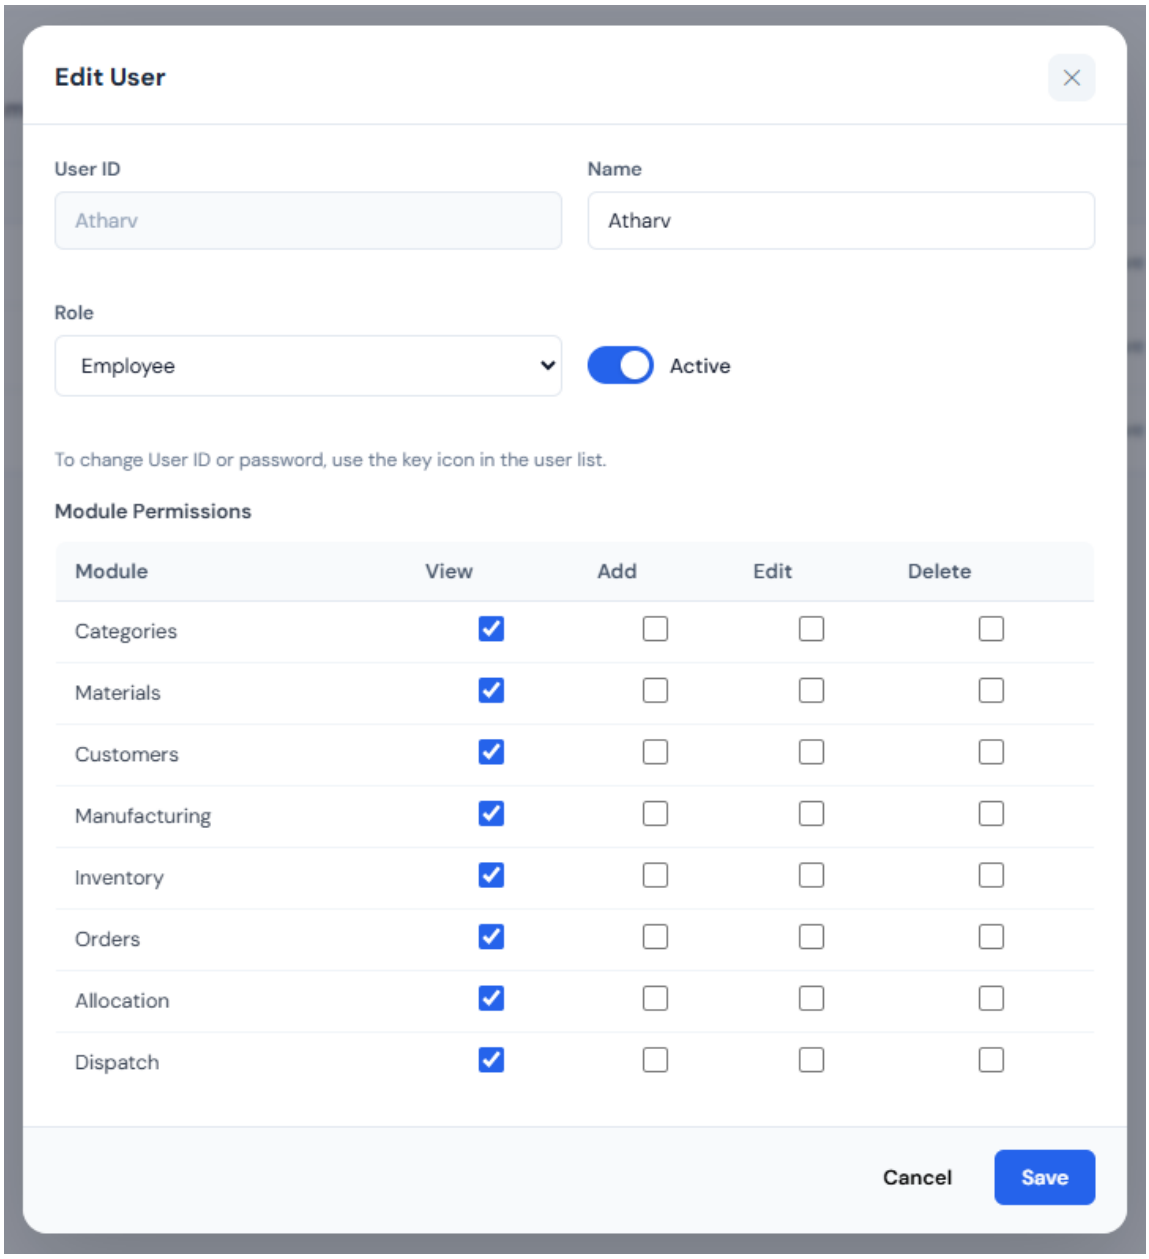

Step 5:

Click on **Create User**.

Edit User

- Click on the Edit icon.
- Update details or permissions.
- Click **Save**.

Delete User

- Click on the Delete icon.
- Confirm deletion.

15. Troubleshooting

Issue	Solution
Unable to Login	Check username and password
Data Not Saving	Fill all mandatory fields
Unable to Access Module	Contact administrator for permissions
Report/Data Not Loading	Refresh the page or relog-in

16. Best Practices

- Verify data before saving.
- Use the correct material and customer details.
- Avoid duplicate entries.
- Regularly check the allocation and dispatch status.
- Logout after completing work.

17. Support

For any issues or assistance, contact:

System Administrator / IT Support Team

Email: - ayush.gunjal@salasarauction.com
Phone: - +91 7447547494

18. Conclusion

This user manual provides a basic guide for using the Stock Monitoring System. Users are advised to follow the defined process and permissions while performing operations in the system.
